

Team name: Disc Finders

Members present: Corey Moura, Timothy Beler

Date: 11/23/2020

Time: 11:21 AM

Discussion points:

- LCD has been successfully integrated with the RFID shield
- Buttons have been implemented to navigate the device software and displays
- Device is now a standalone unit which can read and write to a tag via device inputs from the user.

Goals for next week (include responsibilities)

- Add a feature to erase all tag data
- Add a feature to format new tags
- Awaiting details on final project deliverables
